

Part 1

The **Getting started with ArcMap** ESRI module was completed and the relevant output (final map) is provided below.

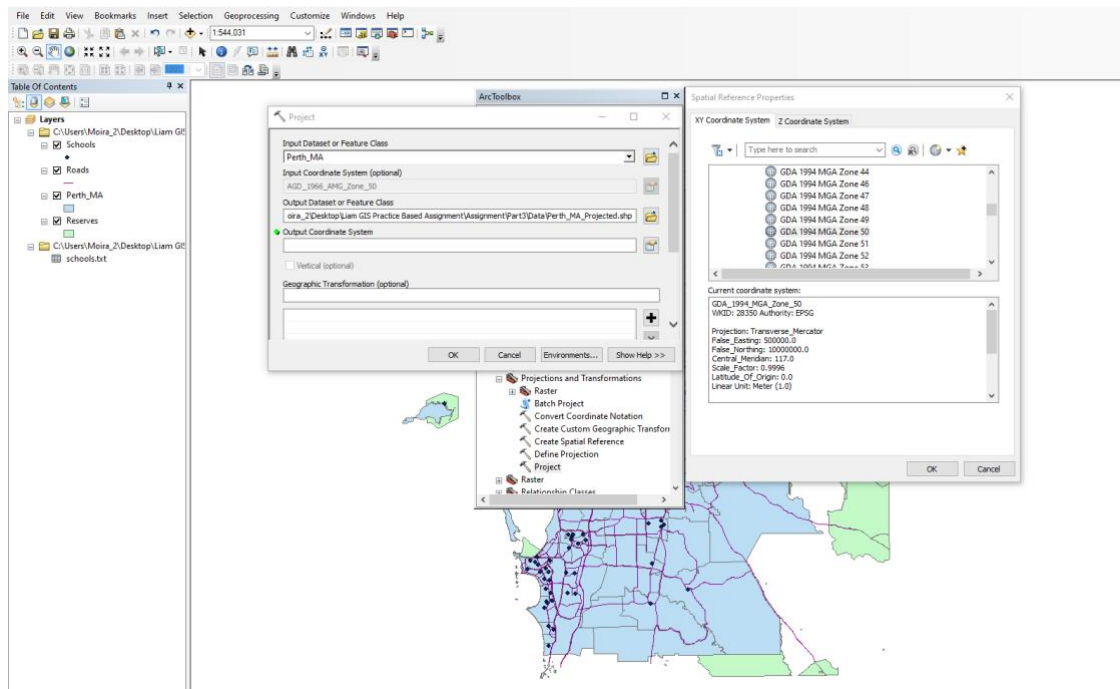

Part 2

The **Getting started with the Geodatabase** ESRI module was completed and the certificate is provided below.

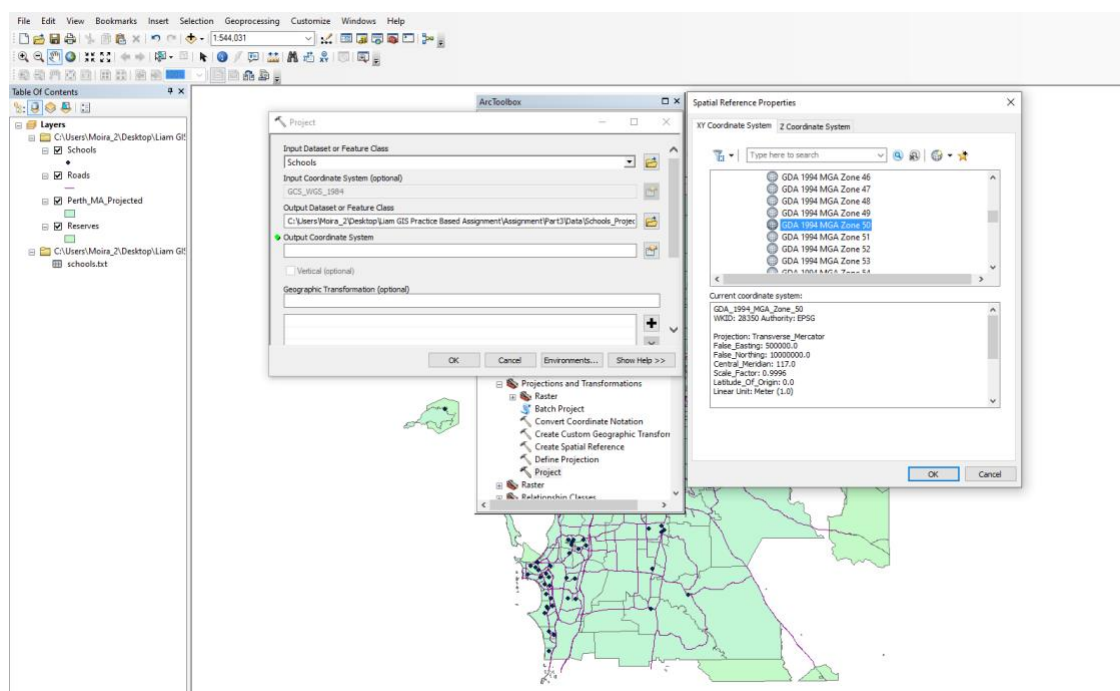

Part 3

The Perth_MA.shp. data is based on the AGD_1966_AMG_Zone_50 coordinate system and should be reprojected to be consistent with the GDA_1994_MGA_Zone_50 projected coordinate system. A screenshot providing evidence that the data was projected is provided below.

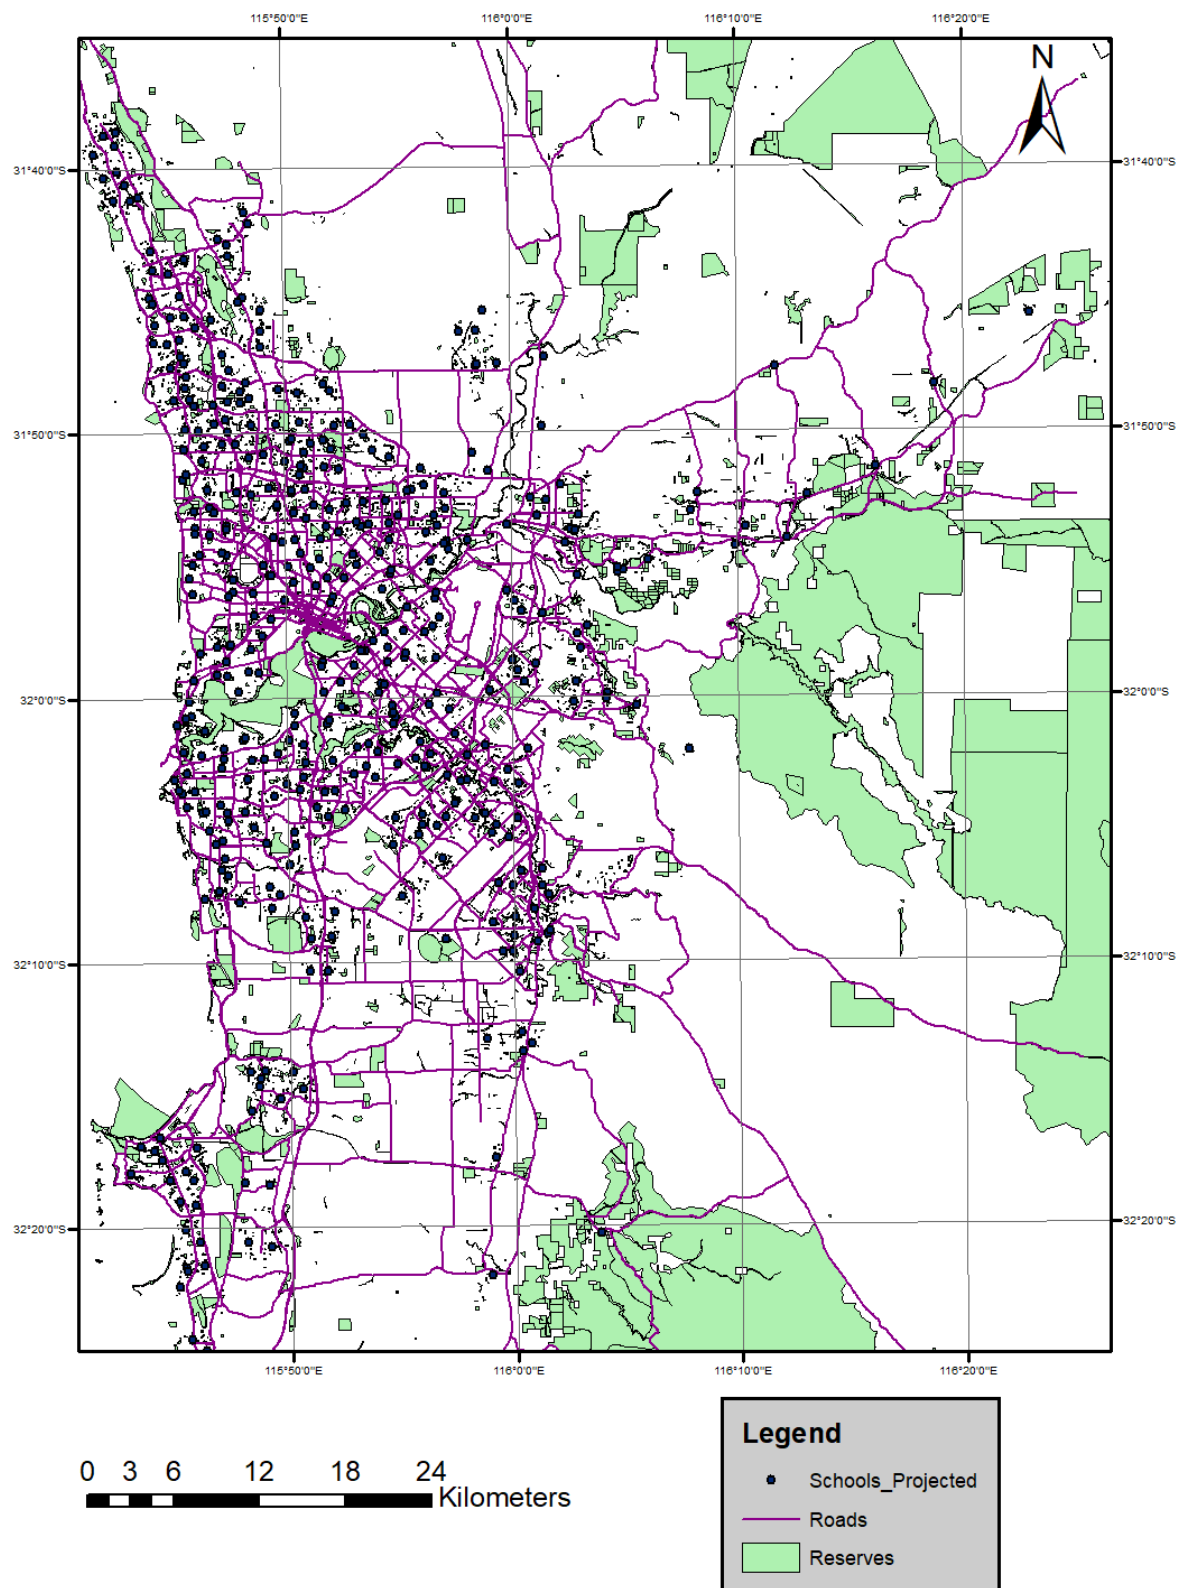

The schools.txt layer should also be based on GDA_1994_MGA_Zone_50 projected coordinate system. A screenshot providing evidence that the data was projected is provided below.

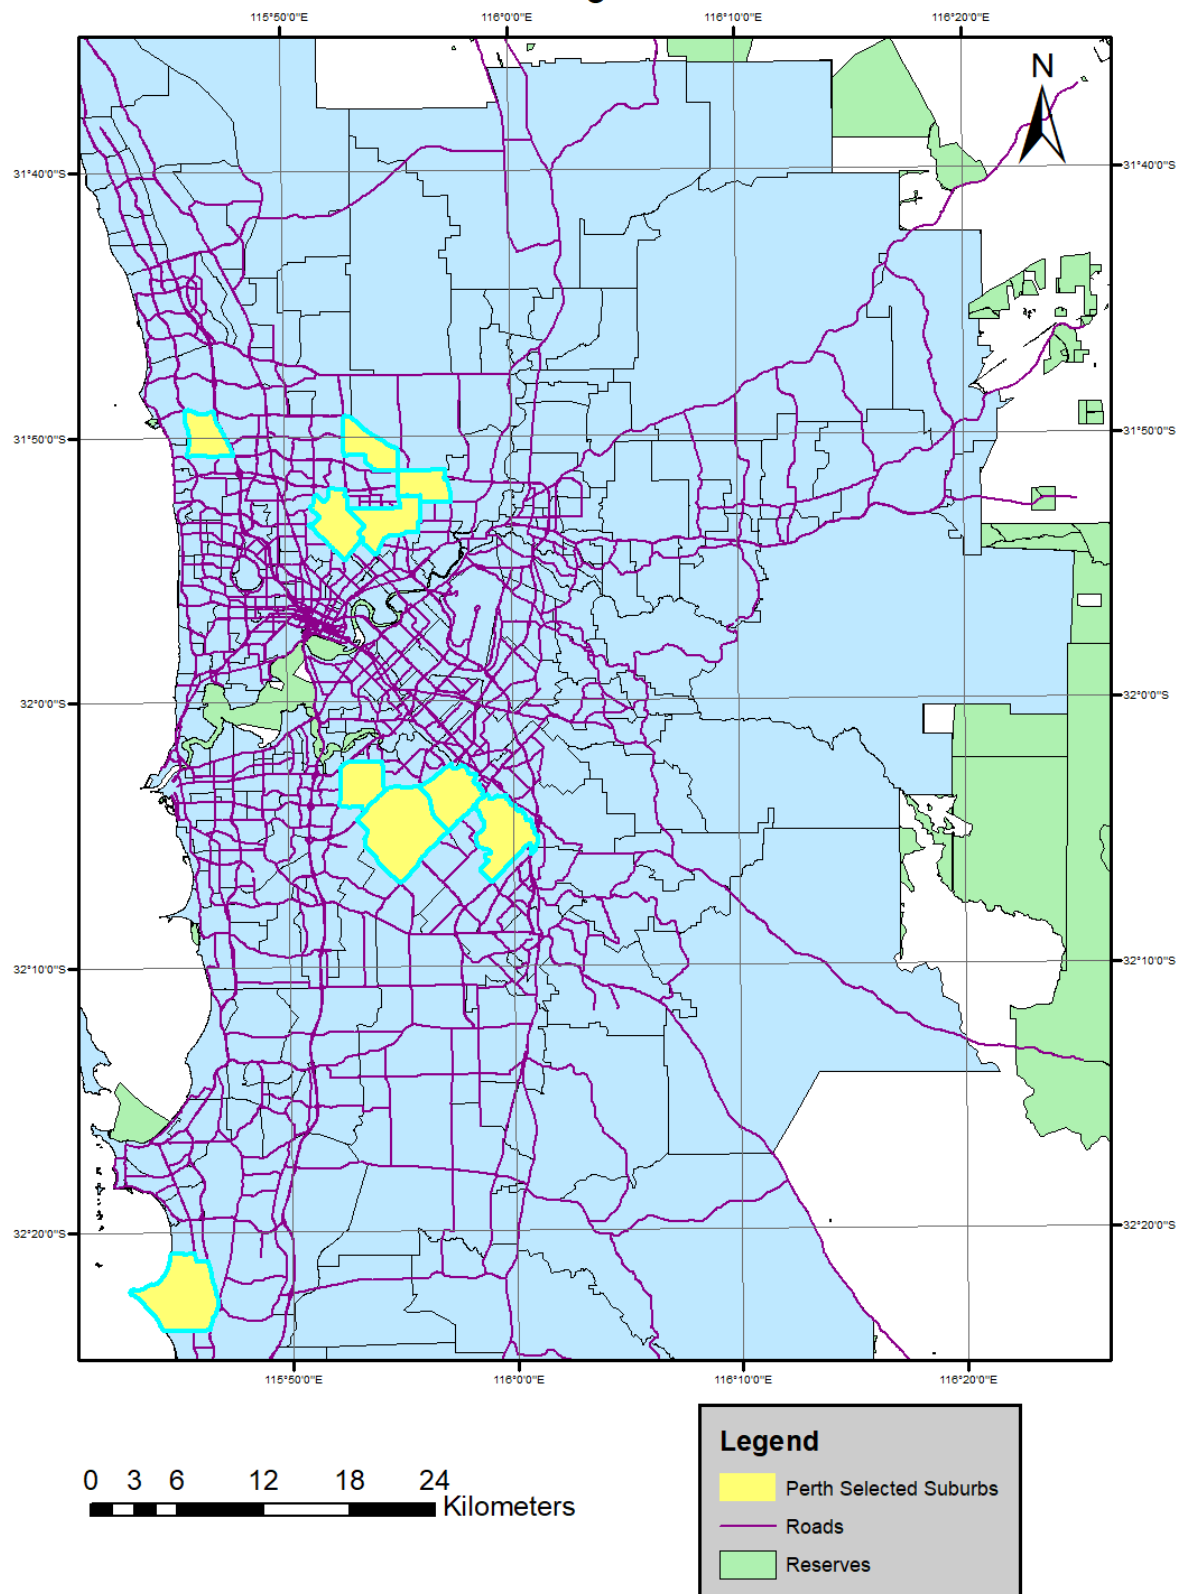

The distribution of high schools in the region (includes only the Roads and Reserve layers).

The Distribution of High Schools in the Region

The first 10 suburbs with the highest number of 15-19-year-olds.

The First 10 Suburbs with the Highest Number of 15-19 Year Olds
